RAMA SURENDRA BABU G

Consultant, IT Architecture

A high-energy technocrat with expertise in designing and delivering complex, high-value projects within strict timelines. Skilled in driving innovative solutions, streamlining processes, and aligning technology strategies with business goals. Adept at creating scalable, efficient, and future-ready solutions to drive organizational success

grsb007@gmail.com

+91-9164545999

CORE COMPETENCIES

- Strategic IT Planning
- Solution / Technical Architecture
- Stakeholder Management
- Technical & Business Analysis
- Agile & Scrum Methodology
- New Product Development
- Defect Tracking & Validation
- Team Management

CERTIFICATIONS

PROFILE SUMMARY

- **Focused professional offering 20+ years of experience in Software & Solutions Architecture across Automobile Automation, Semiconductor (SEMICON), and Supply Chain Management domains.**
- **Expert in Distributed System Architecture, designing and implementing hybrid cloud-native applications using Kubernetes (K8s) on AWS, with hands-on experience in Microsoft Orleans (Actor-based programming) for highly scalable, resilient systems.**
  - Strong exposure to AI-driven architecture design, including:
    Designing AI-enabled microservices and event-driven systems , Integrating Machine Learning models into enterprise platforms, Implementing intelligent workflow automation and predictive analytics solutions. Leveraging Generative AI APIs and LLM-based solutions for automation, analytics, and decision intelligence
- Forward-focused Software Architect with expertise in driving project planning & implementation from scope management to activity sequencing, risk analysis to quality management.
- Excellence in managing complete SDLC with a team of Architects & Developers including design, development, enhancements, customization, requirement gathering & analysis, testing, coding, troubleshooting & debugging, documentation, customer support, and training.
- Implemented Agile/Scrum methodology to add value to deliverables and ensured projects met defined Quality standards including CMMI Level 5 metrics.
- Experienced in proactively tracking and resolving complex technical issues, particularly cross-program distributed system challenges and performance bottlenecks.
- Excellent leadership, strategic planning, and stakeholder relationship management skills with proven capability in leading cross-functional teams to collaboratively design scalable, intelligent, and future-ready solutions.

Technical Skills

Programming Languages: C, C++, VC++, VB6, Managed C++, C#, Core Java, Python, dotnet core
Web Technologies: MVC 4, ASP.NET, HTML5, jQuery, Microservices
Tools and Servers: Rational Rose, Visio, SQL Server Reporting Services, IIS, MSMQ, MTS, Application Center 2000, OPC Server
Operating Systems: Windows 8.1, 2008,2003,2000/98/XP, Linux, Unix, Mac
Repository Tools: VSS, SVN, Source Depot, GitHub, IBM RTC
Hardware Exposure: A2U, A4U (PLCs)
Testing Tools: Windows Testing Technologies, Ranorex
Other Tools: NUnit, Base *, MX-Comp, Application Verifier, Device Verifier, Virtual PC, Virtual Server, Windows Installer XML (WIX) FxCop, Style Cop, Meglain
Enterprise Mobility: Open Plug, RhoMobile, Titanium, Phone Gap, Windows Mobile
Cloud and Container Technologies: Kubernetes, Docker, AWS, Azure
Azure DevOps, GitHub actions

NOTABLE ACCOMPLISHMENTS

- Led solutions architect for 7 releases of 35+ BO/FO applications and received Dell president award.
- Suggested software/ application enhancements which increased efficiency by 35% and reduced cost/ time by 45%
- Enhanced & standardized software defect lifecycle management processes that helped to reduce downtime from bug detection to resolution by 42%

CAREER TIMELINE

AWARDS

- Received Dell President award
- Best Technical Manager in KT-HCL ODC
- Best Valuable Team player in Mindteck & Tech Mahindra

EDUCATION

MCA
NIELIT
2004

WORK EXPERIENCE

Since Mar'25 | Clean Harbors India LLP, Hyderabad | Consultant, IT Architecture

Mar'20-Feb'25| Dell Technologies, Hyderabad | Consultant, IT Architecture

Apr'16-Feb'20 | HCL Limited, Chennai | Technical Manager

Dec'10-Mar'16 | Mindteck Limited, Bangalore| Process Lead

Feb'06-Nov'10 | Tech Mahindra Limited, Hyderabad | Technical Lead

Jun'05-Feb'06 | Satyam Computers, Bangalore| Senior Software Engineer

Responsibilities:

- Leading 15-20 members team and spearheading application development & project execution involving leadership in Architecture, Design, Development, QA and collaboration with Operations, Professional Services, Sales, Product & Network Teams
- Managing complete portfolio of projects including budgeting, estimation, scope, planning & execution of programs
- Outlining project requirements, scope, goals, cost, deliverables and sign-off from key stakeholders
- Mapping client requirements and designing technical solutions to drive product development
- Spearheading Application Development Lifecycle right from requirement analysis, documentation (functional specifications, technical design), coding and testing
- Facilitating functional decomposition of complex requirements into epics and stories
- Providing information related to bugs & defects by analyzing & summarizing development & service issues, ensuring overall quality including functionality, performance & scalability
- Monitoring the team's adherence to the Agile process during project execution
- Mentoring & monitoring the performance of multiple engineering teams to ensure efficiency in process operations
- Developing competency among the team members; managing appraisal process across the levels and conducting interviews to recruit the right talent and resources

PAPERS PUBLISHED

- Clean architecture for microservices using Onion, Adapter and hexagonal patterns with Chassis Framework
- Multi-focus image fusion for semiconductor inspection tools using Deep Learning
- Obsolescence UI Management
- Published Paper on Industry 4.0 on SEMI Domain

POCs & INTEGRATIONS

- Chassis Framework using dotnet
- WebRTC and Tokbox for Video conferencing and online interview
- Zigbee for Home Automation
- Data Analytics using Filed Issues using RTC and Crash dump

PERSONAL DETAILS

Languages Known :English, Telugu, Hindi
Address :B201 Block F, Vertex Prestige, ai Bharat Nagar, Hyder Nagar, Brindavan Colony, Nizampet, Hyderabad, Telangana 500085

~Refer Annexure for Major Products/Projects~

ANNEXURE – MAJOR PRODUCTS

Products : **Asset Management, Win Custom Master General, IMS, Config Forms**
Period : **Mar'25** -Present
Role : Consultant, IT Architecture
Team Size : 40+
Environment : Dotnet, dotnet core, Python, Angular, Node.Js, ReactJS, Kafka, RMQ, SQL Server, IIS, Microsoft Azure, GitHub, Foglight, Dynatrace,

Products : **Order Fulfillment System, Fulfillment Order Orchestration Engine**
Period : **Mar'20 – Feb'25**
Role : Consultant, IT Architecture
Team Size : 100+
Environment : Dotnet, Microsoft Orleans, Chassis Framework, GraphQL, Python, Kubernetes (KOB), Jira, Luigi Framework, Node.Js, ReactJS, Mongo, Neo4J, Tiger graph, Oracle, Kafka, RMQ, IMQ, Splunk, Selenium, Play Write, Dynatrace,

Product : **SWIFT – CIRCL**
Period : Apr'16- Mar'20
Role : Solution Architect
Team Size : 70
Environment : VC++, Java, C#.Net, IBM Jazz, SQL Server, Perl, Python, Theft Server, IBM RTC, Hadoop, Hive, Pig, Image Processing using IPP, Open CV and Mat lab

Spearheading development for enhancements, estimation, process improvements, release management for different versions like 8x to 9X, IRONMAN, factory automation, enhancements for FA.

Product : **Next generation Application Package for Controlling MOCVD Process Tool**
Period : Jan'12-Apr'16
Role : Solution Architect
Team Size : 95
Environment : VB6, VC++, VB.Net, C#.Net, Bugzilla, Citrix, SQL Server 2005, MS Access 2000, Version One, Code Collaborator, Team City, SharePoint

Managed development for enhancements, architect of the solution, estimation, and implementation of core modules.

ANNEXURE – MAJOR PROJECTS

Project : **Limit Repository – Asset Manager**
Period : Aug'14-Dec'14
Role : Associate Architect
Team Size : 12
Environment : WCF, OData, MVC, HTML5, OPC Server

Managed architect of the solution, and estimation.

Project : **Aiolos - PCM**
Period : Jun'14-Feb'15
Role : Associate Architect
Team Size : 20
Environment : ASP.Net, MVC 5, O365, Infragistics

Led architect of the solution, estimation, and implementation of core modules.

Project : **Train View Tools Automation**
Period : Dec'11-Jan'12
Role : Associate Architect
Team Size : 10
Environment : C#, Train View Tools, OPC Server, QTP, Ranorex, SVN, Visio

Front-led development of OPC Communication, Architect of the solution, Estimation, helped in evaluating of Ranorex Tool.

Project : **Anesco Meter**
Period : Dec'10-Nov'11

Role : Process Lead
Team Size : 15
Database : MySQL
Environment : ASP.NET 3.5, Active Reports 6, Comport Art, Mantis Bug Tracker, NHibernate, WCF, Log4Net, SVN, Visio

Front-led development of designing and development of WCF core components, designing of database.

Project : **Connected Services Delivery Platform**
Period : Jul'08-Nov'10
Role : Tech Lead
Database : MS-SQL Server 2005
Environment : Microsoft.NET Framework 3.0, WCF, C#, XML, IIS, Web Services, Windows Services, Product Studio, Source Depot, WTT, Windows Installer XML (WiX), WCAT Tool

Spearheaded design reviews, code reviews, test code development, integration testing, E2E deployment, E2E testing, fixing the bugs.

Project : **Services for UNIX**
Period : Feb'06-Jun'08
Role : Tech Lead/ Developer/ Build Engineer/ Tester
Database : SQL Server, Oracle 9I
Environment : C, C++, C#, Product Studio, Source Depot, Windows Test Technologies, Visual Studio 2005, Visual Studio 2008, Team Foundation

Delegated of work items, tracked FTP, BTP status, and fixed bugs.

Project : **OSEK OS Configuration Tool**
Role : Team Member
Environment : C#, Windows XP, VSS, Visio

Rendered support in System Design and Development, User Interface Design, and Unit Testing.

Project : **Log Server Frame**
Role : Team Member
Environment : C, Sockets, uC/OS, Visual Studio 6.0, Visual Source Safe, Val Grind

Rendered support in System Design and Development, Unit & Integration Testing.

Project : **Production Control**
Role : Project Lead & Team Member
Environment : VB 6.0, Managed C++, CITRIX Meta Frame, Application Center 2000, MX-Comp, PLC's, Bar code readers, Different types of Printers and GOT

Rendered support in System Design and Development, Unit & Integration Testing, User Acceptance Testing, Maintenance and Support.

Project : **Quality Gate System Integration**
Role : Project Lead & Team Member
Environment : C#, Application Center 2000, CITRIX Meta Frame, COM+, Oracle 9I, MSMQ, VSS

Rendered support in System Design and Development, Unit & Integration Testing, User Acceptance Testing, Maintenance and Support.

Project : **Vehicle Tracking System**
Role : Team Member
Environment : C#, Application Center 2000, CITRIX Meta Frame, Oracle 9I, Visual Source Safe, Rational Rose and Rational Purify Plus, Base Star, Rational Rose, PLC's, Bar Code Readers, Different types of printers and GOT

Rendered support in System Design and Development, Unit & Integration Testing, User Acceptance Testing, Maintenance and Support.

Project : **Object View**
Role : Team Member
Environment : Visual C++, Win16 and Win 32, Visual Studio 2.0, Visual Studio 6.0, VSS

Performed DLLs porting from 16 bit 32, Unit Testing, and Interaction Testing.
